Testimonial

We had our website redesigned as we were not satisfied with our previous one. We have seen a vast increase in the number of visitors to the site and hence, far more bookings have been received. We have had nothing but praise for the superb design. We would wholeheartedly recommend Mole End Design and Ulike Systems.

Art and Dawn Jameson

Your Business NEEDS a Quality Website!

for only

£99

We can produce a fully W3C* compliant top quality website using the latest technologies.

We specialise in producing content manageable websites which gives you full control over the content displayed, allowing you to update your site as frequently as you like.

We offer a range of FIXED PRICE SOLUTIONS

Your business may already have a website that's not performing, let us give you a free assessment of your website and provide you with a professional solution.

ukqualitywebsites.co.uk is committed to providing quality affordable websites for every business sector. Existing websites have been developed for local government and both large and small businesses. Examples of W3C* compliant sites can be seen below.

*W3C is the World Wide Web Consortium which develops interoperable technologies to lead the web to its full potential. By conforming to these standards, a website that is W3C compliant can be viewed consistently and successfully.

Photography

ukqualitywebsites.co.uk utilise high resolution digital cameras to produce superlative images for use within your website and any printed media. By utilising sophisticated photo stitching software, we can produce full 3D virtual tours allowing your website visitors to take a realistic tour of your facilities.

Full motion video, to the latest MPEG standards, can also be included in your website to provide a full multimedia experience.

Logo Design

Your logo expresses everything you want to communicate about your company in one design. It is your identity. Using communicative design, we will create a custom logo that will convey your vision, products and image. Most of our logos are created with Adobe Illustrator, as vector art, so are fully scaleable from millimetres to metres without any degradation.

Web Design Services

ukqualitywebsites.co.uk provides a free initial consultation to discuss your requirements. We'll work with you to design a website that suits your unique business needs. We'll also help you keep your image up to date and maintain your website. We can also design dynamic content manageable websites that you can update yourself as often as you like.

Internet Business Card If you don't wish to have a full size website why not go for an Internet Business Card? One page with all of your details on it, an affordable alternative to a website.

Content Management System Using our bespoke Database Packages we can design your website so that you have complete control over its content. This ensures you are not locked into an ongoing maintenance arrangement which can cost £1,000s per year.

Services

ukqualitywebsites.co.uk provides a full range of professional web design, hosting, promotion and maintenance services. With approaching 30 years' professional IT and 20 years' Graphic Design experience, **Ulike Systems** and **Mole End Design** together provide an unequalled service.

When it comes to promoting your product, service, image or idea, successful design is not merely about what's the latest fashion or award-winning. Have you ever been attracted to a visually compelling advertisement, but you can't remember what the product was? Yes, the ad was appealing, but did it generate sales? Appealing graphic design is more than just a pretty face. Design that supports, organises, and improves the readability of your information is what's really important.
